Report on Industry Expert Interactive Session

Title: Applications of AI, GenAI & Agentic AI in Industry

Date:18 August 2026

Time:9:00am-11:00am

Venue: Mech CR-3

Target Audience: TE EXTC

No. of Participants Present: 54

No. of Girl Participants Present: 19

No. of Boy Participants Present: 35

Resource Person: Dr. PushkarM Sathe

Organization of Resource Person: Selec Controls Pvt.Ltd.

Organizing Department / Committee / Authority:IETE-DBIT-ISF

Faculty Coordinator: Mrs.Namita Agarwal

Objectives:

❖To provide participants with an understanding of Artificial Intelligence (AI), Generative AI, and Agentic AI, along with their key concepts and differences.

❖To introduce participants to emerging AI technologies and techniques, including Large Language Models (LLMs), Local LLMs, Retrieval-Augmented Generation (RAG), embeddings, prompt engineering, and AI agents.

❖To familiarize participants with the practical applications and future scope of AI in electronics, IT, industrial automation, and other emerging domains.

Outcomes:

❖Participants gained awareness of how AI technologies can be applied in EXTC domains such as electronics design, communication systems, signal processing, embedded systems, and industrial automation.

❖Participants were able to identify suitable AI approaches for different real-world applications and problem statements.

❖Participants developed a broader understanding of current AI trends, industry requirements, and the emerging career opportunities at the intersection of AI and engineering.

Mapped Program Outcomes:

- PO1 – Engineering Knowledge
  Develop an understanding of the engineering and scientific fundamentals underlying AI, Generative AI, and Agentic AI and their applications.

- PO2 – Problem Analysis
  Understand how AI-based approaches are applied to analyse and address real-world industrial problems.

- PO3 – Design/Development of Solutions
  Gain exposure to the design and implementation of AI-based solutions through real-world industrial projects.

- PO5 – Modern Tool Usage
  Understand the use of modern AI/ML tools and technologies used in industry.

- PO9- Communication
  Opportunity to engage with an industry expert and understand contemporary engineering practices through technical discussion.

- PO11 – Life-long Learning
  Recognize the need for continuous upskilling and adaptability in rapidly evolving domains AI technologies.

Mapped Sustainable DevelopmentGoals(SDGs)

- SDG 4 – Quality Education
  Gain knowledge of emerging AI technologies and their industrial applications.

- SDG 8 – Decent Work and Economic Growth
  Develop awareness of AI-driven career opportunities and industry-ready skills.

- SDG 9 – Industry, Innovation and Infrastructure
  Gain exposure to AI-based industrial applications and technological innovations.

- SDG 17 – Partnerships for the Goals
  Strengthen industry–academia interaction through expert knowledge sharing.

Detailed Report:

An Industry Expert Interactive Session on "Applications of AI, Generative AI and Agentic AI in Industry" was organized by the IETE-DBIT-ISF Students' Chapter, Department of Electronics and Telecommunication Engineering, and coordinated by Mrs Namita Agarwal, Faculty Coordinator, IETE-DBIT-ISF, on 18 August 2026 for Third-Year EXTC students. The session was delivered by Dr Pushkar M. Sathe, Assistant Manager, Selec Controls Pvt. Ltd. The session aimed to provide students with an understanding of the latest developments in Artificial Intelligence and their relevance to engineering and industry.

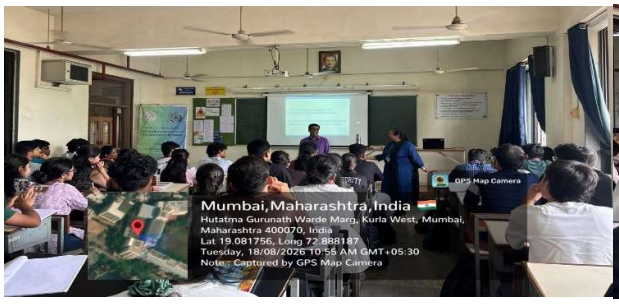

The session began with an introduction to Artificial Intelligence, Generative AI and Agentic AI, highlighting their differences and practical significance. The speaker discussed Large Language Models (LLMs) and the use of local/offline LLMs, including tools such as Ollama, for running AI models locally.

Key concepts such as Retrieval-Augmented Generation (RAG), embeddings and prompt engineering were also introduced. Students gained insights into their applications in information retrieval, document-based systems and generating more relevant AI responses. The concept of AI agents and automation was discussed, with emphasis on their ability to understand goals, plan tasks, use available tools and perform multi-step processes with minimal human intervention.

The speaker highlighted the applications of AI in EXTC engineering, including embedded systems, communication systems, signal processing, IoT and industrial automation. Real-world industrial applications of Agentic AI and RAG were discussed, demonstrating how AI can support task automation, information retrieval, workflow optimization and operational efficiency. The session also covered emerging trends and career opportunities in AI, followed by an interactive Q&A session.

The session concluded with a Vote of Thanks by student representative Mr.Christoval Dsouza, who expressed gratitude to the resource person, organizing committee, faculty coordinator and students for their valuable contribution and participation. As a token of appreciation, a memento was presented to Dr. Pushkar M. Sathe by Dr. Madhvi Pednekar, HOD, EXTC, on behalf of IETE-DBIT-ISF. The event concluded on a positive note with an engaging interaction between the resource person and the participants.

Feedback:

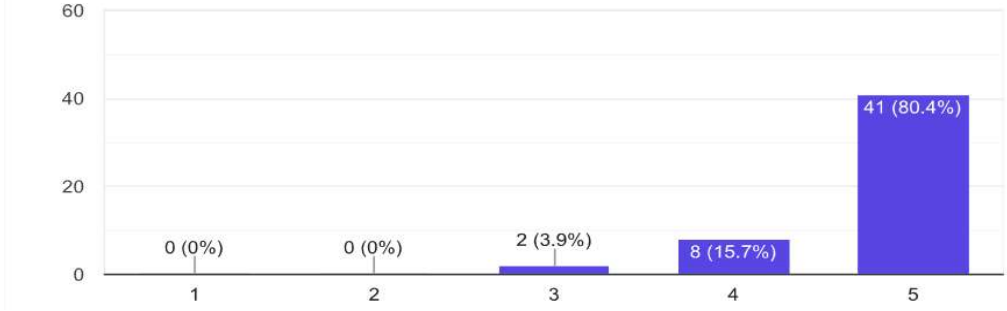

How would you rate the session overall? (1- Poor | 5- Excellent) Copy chart

51 responses

How useful was the session in enhancing your understanding of AI, GenAI & Agentic AI and their industry applications? (1-Not Useful |5-Highly Useful) Copy char

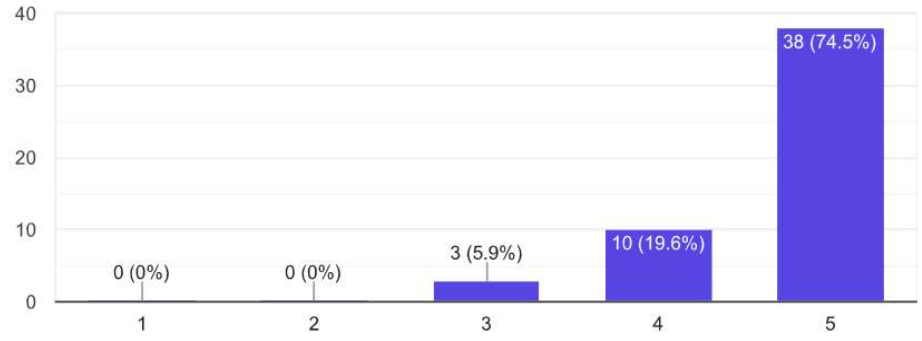

51 responses

How relevant were the industry examples and insights shared by the speaker? (1-Not Relevant | 5- Highly Relevant)

Copy chart

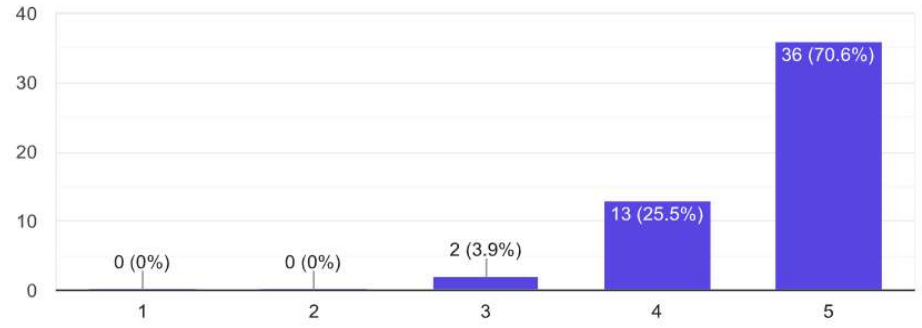

51 responses

How much did the session enhance your awareness of AI-related career opportunities and industry-ready skills? (1-Not at All |5-To great extent)

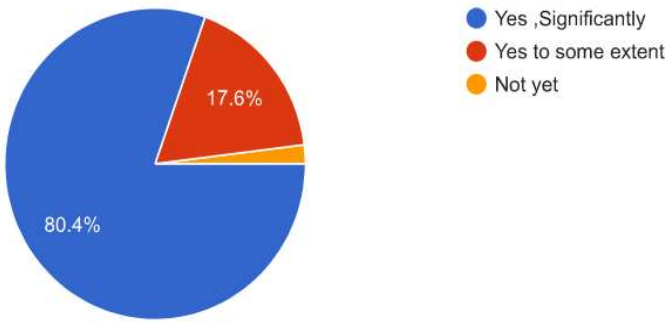

Copy chart

51 responses

Has the session motivated you to explore AI-related technologies or skills further?

51 responses

Analysis:

Feedback was collected from 51 participants through a Google Form and reflected a highly positive response to the session. A total of 41 students (80.4%) rated the overall usefulness of the session as 5/5, while 38 students (74.5%) rated the industry examples and insights as highly relevant. Further, 41 students (80.4%) reported being significantly motivated to explore AI further, while 9 students (17.6%) expressed motivation to some extent. Overall, the feedback indicates that the session was informative, relevant and practically beneficial, while encouraging students to explore AI and its industry applications further.
